

## **Statement from Friends' School, Saffron Walden**

### **A level Results 16 August 2007**

Students at Friends' School Saffron Walden were celebrating a superb set of A level results this morning. 35% of the grades were at A (11% above the National Average), 65% at A and B (15% above the National Average), with 93% A-C (19% above the National Average). Overall the pass rate was 100%.

Nat Warner who will read Natural Sciences at St Andrews and who achieved A grades in Chemistry, Physics, Maths and Geography said, 'I'm absolutely stunned, especially with the fact that I got full marks in two Physics Modules.' Twins, David and Katie Brooks, are both off to their first choice universities to read Physics and Environmental Science despite having to take all their exams in isolation as they were suffering from whooping cough throughout the exam period. Both were anxious about hearing their results but were relieved to see their high grades.

Head Graham Wigley said, 'I am absolutely delighted for our students. They have achieved a most impressive set of results, but results like these do not happen by accident. They are achieved through the hard work and application of each individual student and the abundance of individual care and guidance provided by excellent teachers. We wish our students the best of luck as they all head off to their chosen universities.'
